ABOUT ME

I am a recent computer science graduate from Dian Nuswantoro University. With a foundation in programming, particularly in Python, I have actively engaged in various machine learning projects, which have allowed me to apply my skills in real-world scenarios. My dedication to continuous improvement has driven me to participate in certification programs like Microcredential Junior Data Scientist and Bangkit Academy. I am now eager to take the next step in my journey, seeking opportunities to further develop and apply my expertise in the realm of machine learning and data science programming. Through this introduction, I hope to convey my passion and commitment to this field, and I am excited to explore new challenges and possibilities in the world of data science and machine learning.

PENDIDIKAN

DIAN NUSWANTORO UNIVERSITY

2019 - 2023 Informatic Engineering

BANGKIT ACADEMY

2022-2023 Machine Learning path specialization

EXPERIENCE

2021 MICROCREDENTIAL DATA SCIENCE ASSOCIATION

- Certified as Microcredential Data Science Association
- Writing machine learning project to be utilized for checking an air quality based on air content index

2022 BANGKIT ACADEMY

- Certified as Google Tensorflow Machine Learning Developer
- Become one of the top 15 best capstone projects and receive funding from Google and the Ministry of Education and Culture
- Building the start-up 'Tanamin Indonesia' with funding from Google and GOTO and working as a machine learning developer & COO.

2023 CAMPUS PROJECT

- "Creating a data input platform for the strategic plan of the Faculty of Engineering at Dian Nuswantoro University using Odoo
